EBISA AJEMA BEGI

SOFTWARE ENGINEER • FULL-STACK DEVELOPER • ERP / ODOO DEVELOPER

Addis Ababa, Ethiopia | Available for full-time software development opportunities
LinkedIn: linkedin.com/in/ebisa-ajema-3ba55b274 | GitHub: github.com/Ebisa-Ajema

PROFESSIONAL SUMMARY

Software Engineering graduate focused on Python backend development, full-stack web applications, and ERP customization. Hands-on experience building with Odoo 17, Django, PostgreSQL, React, Bootstrap, Tailwind CSS, REST APIs, and Git. Strong interest in business automation and practical software systems, with experience designing role-based workflows, database-backed applications, reports, dashboards, and administrative platforms. Comfortable learning quickly, debugging complex issues, and turning business requirements into maintainable software.

TECHNICAL SKILLS

Languages	Python, JavaScript, SQL, HTML5, CSS3
Backend	Django, Django REST Framework, Odoo 17, Python ORM, REST APIs
Frontend	React, Tailwind CSS, Bootstrap, Vite, OWL/XML views in Odoo
Databases	PostgreSQL, relational database design, ORM queries, migrations
Odoo / ERP	Model inheritance, @api.depends, create/write overrides, ACLs, record rules, XML views, QWeb PDF reports, wizards
Tools	Git, GitHub, Linux/Ubuntu, VS Code, PostgreSQL tools

SELECTED PROJECTS

Advanced Sales Profit Report — Odoo 17

Python • Odoo 17 • PostgreSQL • XML • QWeb • Excel

- Extended Sales Order and Sales Order Line workflows to calculate product cost, profit, and margin for confirmed sales.
- Built a wizard-based reporting flow with date-range and salesperson filters and company-aware reporting.
- Implemented QWeb PDF reporting and Excel export with access restricted to authorized sales management users.
- Applied Odoo ORM, model inheritance, computed fields, security access controls, and business-rule validation.

Gojo City Administration Platform

React • Tailwind CSS • Django • PostgreSQL • REST API

- Designed a municipal administration platform for public information, departments, city projects, announcements, and civic services.
- Planned a Django backend with modular applications, role-based permissions, department/project relationships, and PostgreSQL persistence.
- Built a modern React/Tailwind frontend structure with responsive navigation, city information pages, project cards, and news sections.

Blog Platform / REST Backend

Django • Django REST Framework • PostgreSQL • JWT

- Developed a backend architecture using Django and Django REST Framework with custom user authentication and profile management.
- Worked with JWT authentication, migrations, PostgreSQL, API endpoints, serializers, permissions, and Django admin.
- Implemented a custom email-based user model and profile relationships while troubleshooting database and migration issues.

Digital Filing System — Gojo City Administration

Python / Web Application Concepts • Digital Records

- Worked on a digital filing-system concept during an internship to improve organization and accessibility of paper-based municipal records.
- Focused on translating an administrative workflow into a structured digital information system.

EDUCATION

B.Sc. Software Engineering — Adama Science and Technology University

Adama, Oromia, Ethiopia | Graduated June 19, 2025

Relevant focus: software development, databases, web technologies, software engineering principles, problem solving, and application development.

PRACTICAL EXPERIENCE

Software / IT Projects & Technical Practice
Hands-on development and technical practice across Odoo ERP customization, Django REST backends, React interfaces, PostgreSQL databases, Linux environments, and Git-based project workflows.

Internship — Gojo City Administration, Ethiopia | Jun 2023 – Aug 2023
Participated in municipal digitalization work, including digital filing concepts and city technology operations. Also gained exposure to city network and monitoring environments through related city administration work.

TRAINING & CONTINUOUS LEARNING

- Odoo 17 development: official framework concepts, ORM, models, views, security, reports, and wizards.
- Udacity Data Analysis short course.
- Continuous learning in Python, Django, React, PostgreSQL, REST APIs, Git, and ERP development.

LANGUAGES

Afaan Oromoo: Native Amharic: Native English: Professional working proficiency

PROFESSIONAL STRENGTHS

- Backend development and database-driven application design
- ERP customization and business process automation
- Analytical problem solving and debugging
- Fast learning and adaptability to new technologies
- Clean, maintainable, security-conscious development
